BARATHRAJ D

Frontend Developer with 4+ years of experience specializing in high-performance React applications, Micro-frontend architectures, and modern build tooling.

barathraj.uidev@gmail.com / barathrajdevarajan.dev / github.com/barathrajd / linkedin.com/in/barathrajd / Bengaluru, KA, India

PROFESSIONAL SUMMARY

- Experienced Senior Frontend Developer with a focus on building scalable enterprise platforms and reusable UI foundations using React and Micro-frontends.
- Proven track record in modernizing legacy frontend stacks, resulting in up to 40% faster build times and significantly improved developer experience.
- Specialist in Shared Application Shells, Module Federation 2.0, and complex UI library development for multi-module enterprise systems.
- Strong expertise in optimizing production reliability through automated release workflows and advanced CI/CD integration.

WORK EXPERIENCE

Frontend Developer
Jun 2021 - Present

Affinsys AI (BankBuddy.ai, TelcoBuddy.ai) *Bengaluru, KA, India*

- Architected and managed 10+ React repositories using Micro-frontend architecture (Module Federation 2.0), reducing cross-team dependency conflicts by 60%.
- Led the full-stack modernization of the frontend infrastructure, migrating to Rspack and pnpm, which reduced local dev startup time from 45s to 3s.
- Developed a high-performance Shared UI Library used across 5 enterprise products, ensuring 100% design consistency and reducing UI development time by 30%.
- Built a configurable Conversational Interface System supporting real-time messaging and multi-tenant customization for global banking clients.
- Established automated release flows using Changesets and Jenkins, increasing deployment frequency by 2x while maintaining zero-downtime reliability.

Frontend Developer
Feb 2021 - May 2021

Spotknack - Mission 2021

- Developed responsive user interfaces for the Spotknack Talent Community platform using React and modern CSS, improving mobile accessibility scores by 25%.

Graduate Product Engineer
Feb 2020 - Oct 2020

FORGE Accelerator *Coimbatore, TN, India*

- Selected for the ProtoSem fellowship among 500+ applicants to design and prototype tech-enabled solutions for industrial and social challenges.
- Collaborated in a multi-disciplinary team to develop a functional IoT-based prototype, focusing on frontend data visualization and real-time monitoring.
- Conducted market discovery and technical validation for cost-effective hardware-software integrated solutions.

TECHNICAL SKILLS

Languages & Core:	JavaScript (ES6+), TypeScript, HTML5 / CSS3, Rust
Frontend & UI:	React, Next.js, Module Federation, Redux / Zustand, MUI / Shadcn/UI, Bootstrap / Core UI
Build Tools & Monorepo:	Rspack / Rsbuild / Rslib, Webpack / Vite, Nx / Turborepo, Rollup / tsup, pnpm / NPM / Git
Quality & Infrastructure:	Vitest / Jest, Biome / ESLint, Prettier, Node.js / Express, CI/CD (Jenkins), Docker / Containers

PROJECTS

Books Management System
Full-stack platform for book exchange and management.

Engineered a scalable system using Node.js and MongoDB to automate book exchange workflows. Implemented robust search algorithms and user profile management, serving a pilot user group for decentralized book sharing.

Technologies: JavaScript, Node.js, MongoDB, React

EveMa Lead Acquisition
Event data acquisition and communication engine.

Architected an analytics-driven platform for capturing exhibitor-visitor interactions. Reduced lead response time by 50% through automated profile-based follow-up triggers and real-time dashboard visualization.

Technologies: React, Node.js, Express, Data Analytics

EDUCATION

Bachelor of Engineering (ECE)
2017 - 2021

Kumaraguru College of Technology
