BARATHRAJ D

Frontend Architect & Developer with 4+ years of experience building scalable enterprise platforms and micro-frontend systems.

barathraj.uidev@gmail.com / barathrajdevarajan.dev / github.com/barathrajd / linkedin.com/in/barathrajd / Bengaluru, KA, India

PROFESSIONAL SUMMARY

- Architected and maintained React-based frontend applications, focusing on shared shell architecture, micro-frontend integration, and reusable UI foundations.
- Led enterprise-wide frontend modernization by migrating legacy systems to Rspack, pnpm, Biome, and rstest, significantly improving build speeds and developer experience.
- Designed and refined shared navigation systems, permission-aware routing, and command/search interactions for complex multi-module platforms.
- Expertise in Micro-frontends (Module Federation 2.0), Redux Toolkit, and MUI, with a strong focus on platform consistency and shared dependency management.

WORK EXPERIENCE

Frontend Developer
June 2021 - Present

Affinsys AI (BankBuddy.ai, TelcoBuddy.ai) *Bengaluru, Karnataka, India*

- Architected and managed 10+ React repositories using Micro-frontend architecture (Module Federation 2.0), reducing cross-team dependency conflicts by 60%.
- Led the full-stack modernization of the frontend infrastructure, migrating to Rspack and pnpm, which reduced local dev startup time from 45s to 3s.
- Developed a high-performance Shared UI Library used across 5 enterprise products, ensuring 100% design consistency and reducing UI development time by 30%.
- Built a configurable Conversational Interface System supporting real-time messaging and multi-tenant customization for global banking clients.
- Established automated release flows using Changesets and Jenkins, increasing deployment frequency by 2x while maintaining zero-downtime reliability.

Spotknack Talent Community | Frontend Developer
February 2021 - May 2021

Spotknack - Mission 2021

- Worked as a Frontend Developer for the Spotknack Talent Community.

Graduate Innovation Engineer
February 2020 - October 2020

FORGE Accelerator *Coimbatore Area, India*

- The Innovation/Startup fellowship program, ProtoSem is a 20-week, full-semester course, during which students are nurtured & guided to develop core technical concepts and key engineering skills and are transformed into 'Innovation Engineers'.
- We work as a team with students from different engineering/technical/science streams, towards designing, developing and testing an innovative tech-enabled solution to solve a real-world problem sponsored by the industry, government, or social sector, etc.
- We are guided to solve real-world challenges using the tools enabled by hardware, software, and computing technologies, and to evolve as Graduate Innovation Engineers and fully rounded professionals.
- We gain skills and competencies to transform ourselves into creative problem-solvers, capable of building deployable/usable prototypes, selecting and applying technology to create cost-effective solutions.
- We innovate and design solutions by setting and achieving metrics in customer development & discovery, value-proposition validation, market definition & sizing, customer acquisition, revenue model & competition analysis.

TECHNICAL SKILLS

Languages & Core:	JavaScript (ES6+), TypeScript, HTML5 / CSS3, Rust
Frontend & UI:	React, Next.js, Module Federation, Redux / Zustand, MUI / Shadcn/UI, Bootstrap / Core UI
Build Tools & Monorepo:	Rspack / Rsbuild / Rslib, Webpack / Vite, Nx / Turborepo, Rollup / tsup, pnpm / NPM / Git
Quality & Infrastructure:	Vitest / Jest, Biome / ESLint, Prettier, Node.js / Express, CI/CD (Jenkins), Docker / Containers

PROJECTS

Books Management System

A platform to sell, buy, and request books.

Built to support book exchange workflows with user-focused interactions. Includes core management capabilities and planned chat features for richer buyer and requester communication.

Technologies: JavaScript, Node.js, MongoDB

EveMa

Event data acquisition and communication platform.

Software for event workflows that enables visitor and exhibitor communication, profile-based analytics, and follow-up optimization to convert high-intent leads into business outcomes.

Technologies: React, Node.js, Express, Data Analytics

EDUCATION

Bachelor of Engineering, ECE 2017 - 2021

Kumaraguru College of Technology

High School 2011 - 2017

Tagore Matric Higher Secondary School
